

2010/2011 VPK Program Hours Calculation Chart

SCHOOL NAME: _____

Start Date: _____ **End Date:** _____

Fill in the number of weekdays from your starting date until end of the month and also the weekdays from first of the month until your last school day. The weekdays of the other months have all been pre-counted for a five day week. Be sure to change them if you do not start at the first of the month or only have less than five instructional days per week. Please do not count out for your non-instructional days; there is a place at the bottom of the form to calculate the non-instructional days into your program calendar.

Summer Program 2010
